

Kaushik Sharma

AI & Software Developer Engineer

Mumbai, Maharashtra | +91-9920720110 | kaushiksharma1432@gmail.com | linkedin.com/in/kaushik-sharma-982748286 | github.com/Kaushiksharma12

SUMMARY

Computer Science student specializing in Artificial Intelligence and Machine Learning, with hands-on experience building AI-driven web platforms, automation pipelines, and data workflows. Skilled in Python, Next.js, and core ML libraries, with practical exposure to REST APIs, authentication, and database design. Seeking an AI internship to build production-grade machine learning and software solutions.

TECHNICAL SKILLS

Languages: C, C++, Core Java, Python, SQL

AI / ML (Foundational): Supervised Learning, Data Preprocessing, Model Evaluation, NumPy, Pandas, scikit-learn

ML Libraries: TensorFlow, Matplotlib, Seaborn, OpenCV

Data & Visualization: Exploratory Data Analysis (EDA), Power BI, MS Excel

Web Technologies: Next.js, REST APIs, OTP & JWT Authentication, Frontend-Backend Integration

Automation & Scraping: Playwright, Puppeteer, Web Scraping (Python)

Databases: MySQL, PostgreSQL, MongoDB

Developer Tools: Git, GitHub, VS Code, PyCharm, Jupyter Notebook, Jenkins, Docker, n8n

PROFESSIONAL EXPERIENCE

Artificial Intelligence Intern

Dec 2025 – Feb 2026

Autowhat (APML) — On-site, Mumbai, Maharashtra

- Developed 10+ responsive frontend interfaces in Next.js with reusable UI components and modular routing, reducing page development time by approximately 30% through a scalable project architecture.
- Built core features of the TenderMatch System, an AI-driven tender matching platform, contributing to system design and workflow planning that automated matching across 100+ tender listings.
- Engineered a lead scraping pipeline using Playwright and Puppeteer browser automation, collecting and storing 1,000+ structured lead records in MongoDB while eliminating manual data entry.
- Developed the Attendance Bot X-force Dashboard with attendance tracking logic, dashboard UI, and 5+ REST API integrations, enabling real-time monitoring of employee attendance data.
- Implemented OTP-based and JWT authentication securing 100% of user sessions, conducted REST API testing across 20+ endpoints with Postman, and managed version control using Git.

PROJECTS

Self Project

Pocket ArcadeX | Next.js, React, TypeScript, Capacitor, PWA, Service Workers

- Developed Pocket ArcadeX, a modern cross-platform multiplayer gaming platform that allows users to play popular board games from any device without installing a native application.
 - Built using Next.js 16, React 19, TypeScript, and Capacitor, developed as a Progressive Web Application (PWA) with offline support, install prompt, service workers, and automatic updates.
 - Integrated five games — Ludo, Chess, Tic-Tac-Toe, Connect 4, and Snakes & Ladders — into a single unified platform.
 - Implemented Single Player mode with an AI Bot supporting multiple difficulty levels for supported games.
 - Developed Local Multiplayer mode for playing on the same device.
 - Built Real-Time Online Multiplayer with room creation, joining via room code, synchronized gameplay, and automatic state recovery after refresh.
 - Optimized application performance, fixed memory leaks, improved state synchronization, and enhanced responsiveness across Android, iOS, and desktop browsers.
 - Designed a mobile-first responsive interface delivering a smooth gameplay experience and cross-browser compatibility.
- Technologies Used: Next.js, React, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Capacitor, Progressive Web App (PWA), Service Workers, Vercel, Git, GitHub.*

Internship Projects

Lead Scraping Automation Tool | Playwright, Puppeteer, Node.js, MongoDB

- Built an automated browser-based scraping pipeline to collect and store 1,000+ structured lead records, eliminating repetitive manual data entry and saving an estimated 10+ hours weekly.
- Designed data validation and storage logic in MongoDB with pagination support across large result sets exceeding 500 entries per query.

Attendance Bot Dashboard | Next.js, REST APIs, MongoDB, JWT

- Built a dashboard interface to visualize attendance records, integrating frontend components with 5+ backend API endpoints for real-time data display.
- Secured application access with JWT-based authentication and session management, protecting 100% of user routes.

EDUCATION

Bachelor of Science – Computer Science (AI and Machine Learning) – CGPA: 7.83

Nagindas Khandwala College, Mumbai University, Maharashtra

Higher Secondary Certificate (HSC) – 46.83%

Durgadevi Saraf College, Mumbai

Secondary School Certificate (SSC) – 72.81%

Aacharya Narendra Dev Vidya High School & Jr. College, Mumbai

COURSES & CERTIFICATIONS

AI Intern – APML (Dec 2025 – Feb 2026) | AI-ML Virtual Internship (EduSkills) | Web Scraping with Python (Coursera / Duke University) | Basics of Python (Infosys Springboard) | AI, MySQL & UiPath (Great Learning) | Core Java, A+ (Max Computer Classes) | C & C++, A+ (Max Computer Classes)

ADDITIONAL INFORMATION

Languages: English, Hindi, Marathi

Soft Skills: Communication, Teamwork, Leadership

Interests: Artificial Intelligence & Machine Learning, Data Analytics, Web Automation, Generative AI Applications, Software Engineering
